EnergyQuote offers a comprehensive range of energy management solutions to mitigate risk and minimise cost in today's changing and complex market place. Our trading, strategy and risk teams, market intelligence, and water cost management divisions provide our UK and European clients with the support and tools they need to meet their business objectives.

Corporate responsibility – We will highlight how your business can meet its environmental objectives and can assist in compliance with legislative policies.

Trading capability – Access all the main broker screens in the UK and Europe (Prebon, ICAP, GFI and Spectron, Powernext, EEX and Endex) as well as newswire services.

Sophisticated E-auction platform – Our on-line system makes going out to tender a simple task as the whole process is automated, offering you complete price transparency.

Water management – Our service offers you a detailed water audit to help identify cost saving opportunities and possible overcharge recovery.

Specialist knowledge – You can rely on us to undertake the purchasing of your electricity and gas in what is an ever-increasingly complex market.

Strategic support – Our strategic and risk management team create and implement solutions in accordance with best practice.

Market analytics – We cut through relevant news and data sources to bring you market intelligence and real-world buying advice.

Cost savings – We will identify the measures you can take to mitigate risk, improve efficiency, reduce consumption and control your costs by selecting the most suitable products that maximise your opportunities.

If you are looking to control costs, improve efficiency, enhance your green credentials or require strategic input, we offer a bespoke consultancy service to meet your needs.

Corporate social responsibility

With government targets to reduce emissions of harmful greenhouse gases, an extended period of record energy price rises during 2005-2006 and numerous incentives for businesses to be more energy efficient, there has never been a better time to take stock of your current situation and assess what your organisation can do to improve its energy usage and reduce costs.

Risk management

EnergyQuote holds the view that our clients' utilities expenditure represents a risk exposure that needs management. As energy markets become more volatile and interlinked and with product choice increasing, it is now possible for consumers to manage risk by adopting tried and tested methods such as "Value at Risk", already proven in the financial sector. Our risk management team can provide you with the latest tools and products so that you achieve the best results.

Water audits

Our water division recognises the complexities and constraints caused by the geographical determination of supplier. We utilise our knowledge and expertise to best manage costs within the suppliers' framework. Implementation of water recommendations resulting from analysis can form part of a client's risk management strategy.

Enter our FREE PRIZE DRAW for a place at our strategic energy price forecasting conference, attended by Europe's largest energy users. Just complete the information below and return this reply card.

Company name:	Name:
Address:	Job title:
	Telephone:
Post code:	Email:
Yearly expenditure (£,000s)	Contract renewal dates (mm/yy)
